

TRANSMEX 2011 - RIDING THE WAVE

The second edition of Transmex Middle East will build on the success in its launch edition and serve as a sourcing point for all types of commercial vehicles. It will also aim to cater to all the sectors of the economy that are in search of cost-effective logistics and transportation solutions.

Exhibitors can also leverage on the high growth prospects of the sector in the country. By participating in Transmex Middle East 2011, global manufacturers and their dealers also stand to gain from the status of the UAE as the commercial hub of the region and the reach and reputation of Expo Centre Sharjah as the leading exhibition venue in the region.

PAST EDITIONS - A RESOUNDING SUCCESS

The fourth edition of Conmex and the launch of Transmex Middle East, which were held concurrently, registered 3,804 trade visitors during its four-day run. Of the total visitors, 3,489 came from the UAE, while overseas visitors accounted for 315 trade representatives.

A total of 128 brands were exhibited during the 2009 edition of ConMEX.

The visitor profile included construction & contracting companies, civil engineering & consulting firms, landscaping companies, ready mix & concrete supply companies, blocks / tiles and marble industry, building materials supply companies, property development companies, distribution & supply companies, transport companies & consultancies, government departments, police, renting and leasing agencies and public administration & building authorities.

The visitors also came from aviation sector, public works department, civil construction agencies, ports & shipping, railways, roads & highways, import-export traders and stockists.

ConMEX middle east 2011 & transmex middle east 2011

KEY REGIONAL SOURCING PLATFORMS

Conmex is the region's largest and highly focused exhibition dedicated to supplying machinery and equipment to the construction industry, while Transmex Middle East is an exclusive platform for commercial vehicles.

Together, they offer a cost-effective platform that is known for its competitive pricing on a wide range of machinery, equipment, vehicles and related services to the logistics and construction sectors.

Conmex also has a unique selling proposition – it is the region's first trade exhibition to feature outdoor as well as indoor display areas, thus helping visitors see the functioning of the machinery on display.

Transmex will once again showcase everything from trucks and buses to trailers and wreckers.

TRANSMEX EXHIBIT PROFILE

- ▼ Airport Transport Vehicles
- ▼ Ambulance and Medical Services Vehicle
- ▼ Armoured Carrier Vehicles
- ▼ Bank Vehicles
- ▼ Body Builders for Trucks and Trailers
- ▼ Box Trucks
- ▼ Buses, Mini Buses and Vans
- ▼ Caravan and Campers
- ▼ Dump Trucks, Tri – Axle Dumps
- ▼ Electrically operated vehicle
- ▼ Fire Trucks and other Fire Fighting Vehicles
- ▼ Flat Bed Trucks
- ▼ Fuels, Lubricants and Petrol Stations
- ▼ Garage equipment and services
- ▼ Heavy Trucks
- ▼ Hoisting Machines – Electric and Engine Driven Trucks
- ▼ Light Trucks and Pick-Up Trucks
- ▼ Lubricants, Fuels and Oil supplying Companies
- ▼ Parts & Accessories and Attachments
- ▼ Refrigerated Trucks
- ▼ Refrigeration Equipment for Vehicles and Containers
- ▼ Servicing, Repair and Maintenance Equipt.
- ▼ Spare parts and components
- ▼ Special Utility (purpose) vehicles
- ▼ Tractors
- ▼ Trailers and bodies
- ▼ Trailers and Semi-Trailers
- ▼ Tow Trucks
- ▼ Trucks – Light, Medium & Heavy Duty
- ▼ Vehicles for passengers transport
- ▼ Wreckers

REVIVING CONSTRUCTION ACTIVITY TO SPUR DEMAND

From the world's tallest building to the first zero-carbon city, the GCC region has over the past decade pushed the limits of what can be achieved in construction.

And, despite the slowdown in the global economy, it continues to lead the world in the scale and ambition of its projects.

Locally, the UAE's construction sector is expected to bounce back in 2011 with a large number of projects set to be awarded this year, a study has revealed.

Projects worth US\$ 714.8 billion are currently either at design stage or under way in the country.

This trend is expected to continue in the short term with the UAE government's drive to stimulate the economy by spending heavily on infrastructural development, including nuclear power plants and rail projects.

These activities are set to drive demand for construction equipment, vehicles, machinery, cranes, tools & special systems, formwork safety devices, commercial vehicles and other related products and services.

The Middle East being a re-export hub due to its strategic location also sees good demand for commercial vehicles to transport goods across the country.

The oil and gas sector in the country and the rest of the GCC are cruising ahead on relatively high prices. Gulf-based oil firms are planning massive upstream investments worth \$365 billion in the sector in the near future. This will result in the region seeing the emergence of several new manufacturing units and oil and gas

facilities, triggering demand for heavy vehicles such as trailers, oil tankers, LNG carriers and the likes.

Besides, tens of thousands of trucks are deployed by construction and logistics firms on a daily basis to transport building materials and other goods. Both road-going and non-road trucks suffer from a common problem – wear, damage and carry back due to hauling rocks, sand, gravel and other materials. Vehicle bodies need to be customized according to the nature of the goods they carry and this area holds huge potential in the UAE as well as the region due to their reliance on construction and logistics sectors.

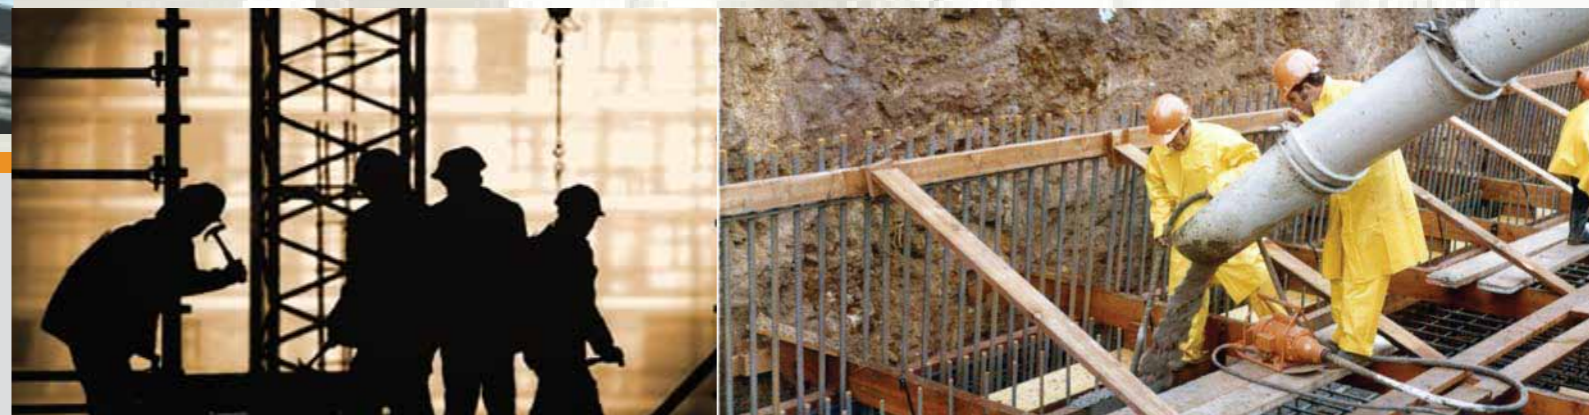

CONMEX 2011 – BUILDING BUSINESSES

Now into its fifth edition, Conmex Middle East will offer complete technological and services solutions to the construction sector.

The previous show had featured leading exhibitors and well-known brands from over 30 countries at 30,000 square metres of indoor and outdoor exhibition space. The next edition will be held at Expo Centre Sharjah from October 24 to 27, 2011.

Being a special attraction at the show, country pavilions will highlight the dominance and resourcefulness of several nations in this field and will offer buyers a one-of-its-kind sourcing opportunity.

The show will also feature live demonstration of tower cranes, forklifts, earthmovers, concrete batching plants, and other light and medium range machinery, equipment and vehicles in the outdoor display area.

CONMEX EXHIBIT PROFILE

- ◆ Excavators, loaders, earthmoving and planing machines
- ◆ Construction machinery, equipment, tools and specialized systems
- ◆ Construction & commercial vehicles
- ◆ Tower cranes, mobile cranes
- ◆ Quarry mining and tunneling machinery and equipment
- ◆ Machinery for road construction, maintenance and repair
- ◆ Plant and machinery for asphalt, concrete, cement & stone
- ◆ Railway engineering solutions
- ◆ Systems for destruction & demolition
- ◆ Crushing units and equipment for disposal of construction debris
- ◆ Lifting and conveying equipment
- ◆ Pumps, compressors, hydraulic and pneumatic tools
- ◆ Generators, electric power stations and engines
- ◆ Components, wearing & spare parts and attachments for machines and mechanisms
- ◆ Construction site facilities
- ◆ Safety, communication & navigation equipment
- ◆ Tools and special systems
- ◆ Heavy equipment attachments, formwork and scaffolding
- ◆ Spare parts, accessories
- ◆ Building material design and making machinery
- ◆ Other related products and services
